

A 5x5 grayscale pattern. The center square (row 3, column 3) is white. The squares directly above and below it (row 2, column 3 and row 4, column 3) are light gray. The squares directly to the left and right of the center (row 3, column 2 and row 3, column 4) are medium gray. All other squares are dark gray.

A 5x5 grayscale grid. The center cell (row 3, column 3) is black. The four cells immediately adjacent to the center (up, down, left, right) are dark gray. The four cells at the corners of the 3x3 area around the center are medium gray. The outermost cells (the corners of the 5x5 grid) are light gray.
